

## Understanding and formulating the problem

- How much do we consume?
- 2. What is our current energy mix?
- 3. What are the objectives for 2030?
- 4. What are the current trends?
- 5. How do we compute CO2 emissions?
- 6. From where does our primary energy come?
- 7. ..
- 8. ..
- 9. ..
- 10. Will we have done enough in EU by 2030 to reduce our CO2 emissions?

## Collecting, cleaning and storing data

- IPCC reports
- https://en.wikipedia.org/wiki/Conference of the parties
- https://www.iea.org/
- https://transparency.entsoe.eu/
- https://ec.europa.eu/eurostat/home?

## And then ...

- 1. Exploring the data
- 2. Analyzing the data
- 3. Storytelling and viz
- 4. Return to step 0;)
